# Our Story

We have been a fabric printer, fabricator and lighting manufacturer for over 40 years. We service the retail, tradeshow and event industry.

We are all learning, adapting, and pulling together each day to make the most of the situation. Over the last 6 months, McRae has been working hard to understand the most critically needed supplies and how we can help with our manufacturing capabilities.

We decided manufacturing face shields, masks and protective acrylic shields are the best items we can produce for essential workers.

In conversations with a number of our partners and clients across the country, many want to help the essential workers in their communities but may not have the ability to create the most needed items. This gave us the idea to invite you into our process in order to help in your community.

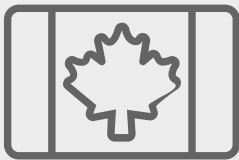

McRae's resources alone can only produce so many masks and shields but with the support of our partners and clients we can do so much more. This support can take many forms including the donation of raw materials, helping to pack and ship, or financial support. We can then work with you to get those masks, face shields and protective shields to essential workers in your community.

# Why McRae mask?

You wear a mask to protect others.  
Others wear a mask to protect you!

Water based Dyes - Safe to Breathe  
Reusable and Better for Planet
